Dr. Adele Goldberg *(415) 494-4385*
Manager, Learning Research Group
Xerox Palo Alto Research Center
3333 Coyote Hill Road
Palo Alto, California   94304

Dear Adele:

I would like to thank you and the Learning Research Group for a most
enjoyable and informative visit. The lunch, meetings, and demonstrations
were very helpful to us and have helped to establish a good working
relationship between members of our respective groups.

We are eager to pursue the idea of articles for Software: Practice and
Experience. If you could contact the other implementors to determine
their interest in such an endeavor, we would be most appreciative. In
a related area, we are willing to organize the first meeting of the
Smalltalk-80 implementors, with the view of eventually forming a
Smalltalk-80 users group.

We are quite interested in further exploring user interfaces that
utilize the SRI mouse and we are interested in purchasing a few from
Xerox. Could you put us in touch with the appropriate person at Xerox?
The appropriate contact at Tektronix would be Paul McCullough at (503)
629-1339 or mail stop 92-803.

We would like to emphasize our desire to perform technical editing for
the next draft of the Smalltalk-80 book, as well as the second book,
Ted Kaehler's LOOM paper, and other manuscripts for which you might seek
outside review.

Finally, we would very much like to explore the possibilities for joint
research between the Learning Research Group and Tektronix.

Sincerely,

George I. Rhine, Jr.
Systems Engineering and Technology
